Areas Not Accessible:	Structure unsafe

On April 3, 2014, a pre-demolition Asbestos Containing Material (ACM) Survey of the unoccupied residential property at **15503 Inverness, Detroit, MI** was performed by personnel who have EPA approved training and are certified by the State of Michigan of Department of Licensing and Regulatory Affairs (LARA) Asbestos inspector(s) **Harrison Flemming A31169**. The purpose of this survey was to task accredited asbestos inspectors to complete an Asbestos survey and a visual assessment of hazardous material of the site that may require disposal prior to demolition and provide recommendations for removal.

The vacant residential structure is wood frame which is severely fire damaged and collapsing.
